## Introduction

### Product Description:

**Mathematica Desktop** is software for exploring computation, processing data, developing applications and interfaces, and authoring independent artifacts called notebooks. Thus, it has an authoring interface as well as a user interface for the generated notebooks. Users can elect to use the traditional desktop interface, but the browser-based (“Cloud”) interface tends to be more performant in terms of accessibility.

**Wolfram Player** retains all the software features of Mathematica Desktop without the authoring capabilities. Thus, notes concerning the Authoring Tool do not apply.

**Contact Information:** [compliance@wolfram.com](mailto:compliance@wolfram.com)

**Evaluation Methods Used:** Manual testing and verification.
